PARICHEHR TALEBZADEH

PORTFOLIO LINKEDIN

PRODUCT DESIGNER

AMSTERDAM, NETHERLANDS, +31 657248971, INFO@PARICHEHR.DESIGN

AVAILABLE IMMEDIATELY · WORK PERMIT: VALID UNTIL 11/2027

SUMMARY

Product Designer with 5+ years designing complex B2B and SaaS products across ERP, supply-chain/logistics, and consumer platforms. Owns problems end-to-end: runs discovery and validation, builds design practices and design systems from scratch, and makes fast, evidence-based decisions for both novice and power users. Turned research findings into measurable growth, including 87 to 1,500+ daily active users at ONTON and +171% monthly active players at Challenquiz.

EXPERIENCE

Product Designer — Freelance

SEPTEMBER 2025 – PRESENT

NOMADIC · VISION-AI PLATFORM FOR AUTONOMOUS-VEHICLE VIDEO DATA

Remote

- Co-redesigned Nomadic's website and brand visual identity as one of two designers within 4 months.
- Reduced revision rounds and accelerated implementation by presenting animated, interactive prototypes built with Claude and Figma AI.

Product Designer

DECEMBER 2023 – JULY 2025

ONTON · WEB3 EVENT PLATFORM ON TELEGRAM

Remote (Finland)

- Led design as the sole designer, establishing the design practice and identifying event creation as the key driver of user growth.
- Redesigned event creation flow, reducing time by 86% (from ~7 min to ~1 min) and increasing completion rate from 20% to 81% through usability testing and analytics.
- Grew daily active users from 87 to 1,500+ in 20 months through product enhancements, with zero marketing spend.
- Doubled returning organizers (from 2 in 5 to 4 in 5) and increased user retention by 21.2% by introducing event duplication and repeat scheduling.
- Designed campaign landing pages, game interface, animations, and illustrations for the launch of ONION, ONTON's native token on the TON blockchain.

Product Designer

JULY 2023 – DECEMBER 2023

CHALLENQUIZ · REAL-TIME MULTIPLAYER QUIZ PLATFORM

Remote (Finland)

- Identified a critical onboarding drop-off as the sole designer through think-aloud usability testing: players mistook the pre-game wait for a frozen app.
- Halved time-to-start (from ~127s to ~62s) and increased game completion from 60% to 100% by redesigning the end-to-end flow around live game rooms.
- Grew monthly players finishing a game by 171% (from 535 to 1,451) and raised satisfaction from 1.6 to 4.0 out of 5 by showing opponents and real-time standings.

Product Designer

NOVEMBER 2022 – JUNE 2023

EZAMPART (TAFARDA STUDIO) · AUTOMOTIVE SPARE-PART SUPPLY-CHAIN PLATFORM

Tehran, Iran

- Eliminated 3 unnecessary handoffs in the ordering model by leading field research in repair shops and warehouses and designing around real storage and purchasing behavior.
- Increased direct website sales by 22% by unifying 8 separate platforms (catalog, shop, requests, news, media, representatives, and profiles) into one, improving findability.

UI/UX Designer

MAY 2021 – SEPTEMBER 2022

CONNECT2WOW (RDSYSCO) · ENTERPRISE ERP FOR CANADA'S OIL & GAS INDUSTRY

Remote (Canada)

- Restructured ERP information architecture from 7 top-level areas into 4 validated modules, unifying HR, safety (HSE), training, and field engineering for 6 user types.
- Co-built a design system of 65 component sets and 370 icons with Atomic Design, enabling a team of 3 designers to design 50% faster (measured across sprints).
- Designed end-to-end chat, calendar, 3 document editors (PDF, Word, and engineering), and HR onboarding, offboarding, and performance-review flows.
- Created a 6-type notification model based on priority, source, and status, replacing ad-hoc per-screen alerts with one consistent system.

EDUCATION

Master of Interaction Design

SEPTEMBER 2025 – AUGUST 2026

AMSTERDAM UNIVERSITY OF APPLIED SCIENCES (HVA)

Amsterdam, Netherlands

- Led and contributed to research, ideation, prototyping, and user testing in multidisciplinary teams across two projects.

Bachelor of Industrial Design

SEPTEMBER 2017 – JANUARY 2022

ART UNIVERSITY OF ISFAHAN (AUI)

Isfahan, Iran

- Built a foundation in core design principles (form, function, and user-centered thinking) across both physical and digital products.

SKILLS

- **Leadership & contribution:** creative direction, team leadership, stakeholder management, workshop facilitation, mentorship
- **Strategy:** systems thinking, brand strategy & identity, campaign strategy, scalable patterns, documentation, behavioral-change design
- **Design & production:** human-centered design, UX/UI design, product design, visual design, web design & development, gamification, motion & animation, photography, customer journey mapping, usability testing, user interviews, information architecture, interaction design, accessibility, measurement frameworks
- **Tools:** Figma, Figma AI, Framer, Claude, Miro, Jira, Notion, HTML/CSS

LANGUAGES

- **Farsi:** Native
- **English:** C1 (Advanced proficiency)
- **Dutch:** A1 (Learning)
