PROFILE

Product Designer with 5 years of experience designing consumer applications and enterprise software from discovery through launch. I partner closely with product managers and engineers to simplify complex systems, validate ideas through research and analytics, and translate business goals into intuitive product experiences.

My experience spans consumer applications, enterprise software, and digital ecosystems where simplifying complexity, collaborating across disciplines, and making evidence-based product decisions are essential.

EXPERIENCE

ONTON (Full-time)
Product Designer

Remote (Finland)
Dec 2023 – Jun 2025

Consumer platform enabling users to create, discover, and verify blockchain-based events inside Telegram

- Shaped product direction as the sole Product Designer, partnering with Product, Engineering, and Marketing to prioritize roadmap initiatives and deliver features from discovery through release.
- Redesigned onboarding, event creation, profile management, and engagement experiences, contributing to growth from 87 to 1,500 daily active users and 30,000+ registered users within 13 months.
- Reduced event creation time by 36% (3:34 → 2:17) by simplifying the event creation model, restructuring the information architecture, and validating improvements through usability testing and product analytics.
- Combined user research, moderated usability testing, community feedback, and Metabase analytics to identify friction, validate hypotheses, and measure product outcomes after launch.
- Influenced roadmap decisions by challenging assumptions with behavioral evidence, usability findings, and product design principles, helping balance user needs with business objectives.
- Designed and evolved a scalable design system supporting more than 20 user journeys across consumer and organizer experiences, improving consistency and development efficiency.

ChallenQuiz (Contract)
Product Designer

Remote (Finland)
Nov 2023 – May 2024

Gamified consumer application on Telegram

- Investigated a major onboarding drop-off using moderated usability testing and think-aloud sessions, revealing that users misunderstood waiting states and received insufficient feedback before games started.
- Redesigned onboarding, waiting, and notification experiences to better communicate system status and user expectations.
- Contributed to a 2.7× increase in users completing their first game through iterative validation before implementation.
- Collaborated with Product and Engineering to deliver user-centered improvements while balancing technical constraints and delivery timelines.

Ezam Part (Full-time)
Product Designer

Tehran
Nov 2022 – Jun 2023

Digital supply chain platform for automotive spare-part distribution

- Designed the first phase of a digital ecosystem connecting manufacturers, warehouses, retailers, repair shops, and customers to improve spare-part availability and delivery efficiency.
- Conducted field research with repair shops and retailers to understand operational workflows, storage limitations, and purchasing behavior before defining product requirements.

- Led the redesign of Ezam's digital platforms and established a shared design language to support future ecosystem expansion.
- Delivered responsive web experiences following accessibility best practices while creating scalable design foundations for subsequent product phases.

RDSysco (Full-time)
Product Designer

Remote (Canada)
May 2021 – Sep 2022

Enterprise ERP platform supporting large-scale oil & gas projects

- Simplified complex workflows across engineering, finance, HR, operations, recruitment, and project management modules supporting highly permission-based enterprise environments.
- Collaborated with solution architects, engineering teams, and business stakeholders to translate complex operational requirements into scalable product experiences.
- Produced more than 70 interactive prototypes and facilitated over 100 stakeholder workshops, with approximately 90% approved during first review.
- Co-developed a reusable design system containing 30+ documented components, interaction patterns, variants, and implementation guidelines adopted across multiple product modules.
- Worked within Agile product teams throughout discovery, planning, prototyping, and iterative delivery.

SKILLS

Product Design:

Product Discovery • Interaction Design • Information Architecture • User Experience • Design Systems • Accessibility • Prototyping

Research & Validation:

User Interviews • Usability Testing • Think-aloud Studies • Surveys • Card Sorting • Tree Testing • Diary Studies • Heuristic Evaluation

Analytics:

Metabase • Product Analytics • KPI Definition • A/B Testing • OKRs • North Star Metrics

Tools:

Figma • FigJam • Claude • ChatGPT

EDUCATION

Master of Interaction Design (HVA - Amsterdam, Netherlands)

Sep 2025 - Aug 2026

Bachelor of Industrial Design (AUI - Isfahan, Iran)

Sep 2017 - Aug 2022

LANGUAGES

English (Fluent)
Farsi (Native)
Dutch (A1)
