

PARICHEHR TALEBZADEH

Product Designer

PROFILE

Product designer with 5 years of experience across consumer platforms and B2C products. I design for growth and retention; diagnosing drop-offs through user research, restructuring flows that aren't converting, and validating improvements through testing and analytics. Track record of measurable impact on the metrics that matter: user activation, task completion, engagement, and retention.

EXPERIENCE

Product Designer | [ONTON](#) (Full-time)

Event management platform serving organizers and attendees · 30,000+ users
Remote (Finland) · Dec 2023 – Jun 2025

- Redesigned onboarding, event creation, and engagement flows as the sole designer — product grew from 87 to 1,500 DAU and 30,000+ registered users in 13 months
- Cut event creation time by 36% by restructuring a fragmented multi-step flow into a guided model validated through usability testing and product analytics
- Built a design system spanning 20+ user journeys that became the shared reference between design and engineering, replacing ad-hoc specs with documented, reusable patterns

Product Designer | [ChallenQuiz](#) (Contract)

Real-time multiplayer gaming platform with competitive quiz mechanics
Remote (Finland) · Jul 2023 – Dec 2023

- Diagnosed a critical onboarding drop-off through think-aloud sessions. Users mistook pre-game waiting states for a frozen app. Fixing the root cause drove a 3.7× uplift in user retention
- Consolidated a disorganized 6-category navigation into 4 clear tabs; Challenges, Profile, Wallet, Leaderboard, giving users a recognizable app structure for the first time. First-game completion rose from 2 in 10 to 6 in 10 users
- Redesigned the in-game experience to surface real-time competitive feedback; answer correctness, question progress, and competitor status, that players previously had no visibility into

Product Designer | [Ezam Part](#) (Full-time)

Digital supply chain platform for automotive spare-part distribution
Tehran · Nov 2022 – Jun 2023

- Mapped the full distribution journey from production to consumption across five stakeholder types, identified and eliminated 3 unnecessary handoffs, shortening the path from manufacturer to end customer
- Led field research in repair shops and warehouses, translated real-world storage constraints and purchasing behaviors into the platform's ordering model, planned across 3 phases over 2 years

UI/UX Designer | [RDSysco](#) (Full-time)

Enterprise ERP platform for large-scale oil & gas project management
Remote (Canada) · May 2021 – Sep 2022

- Designed audit-critical workflows across finance, recruitment, and project management modules, environments where a missed permission or skipped approval step had real operational and compliance consequences
- Achieved ~90% first-review approval on 70+ prototypes by running 100+ cross-functional workshops before design execution, building trust in an organization accustomed to waterfall delivery
- Co-developed a 30+ component design system within a 3 designer team, with documented interaction patterns adopted as the standard across 6 product modules
